

Google Workspace Email Id password generation

Step 1: Log in to your Gmail account.

Step 2: Go to “**Manage your Google Account**” in the top right-most corner of your Gmail.

Step 3: Choose the Security option from the left side.

Step 4: If 2-step verification is not enabled then Enable 2-step verification by providing a captch/ or by password/text message verification. It depends on your choice. I choose text message verification.

Step 5: Once the 2 step verification is ON. Go to Security -> App password.

Step 6: It will ask for your password confirmation. After that, it will take it App password generate screen.

Step 7: It will ask for you to select the app and device. That you want to use the password.

Choose the app ->mail and device others

Step 8: Provide a custom name. Here I give the name **Shikshakpro Spring**.

Step 9: Click on **Generate** button. It will generate 16 digit App password which is unique. And note it some were. It will not accessible again.

Step 10: Click on the **Done** button.

Step 11: Now add this password to your application.properties
